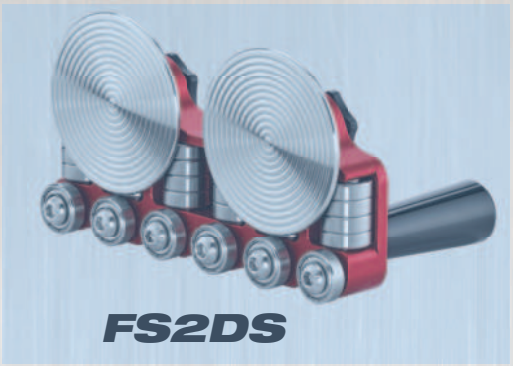
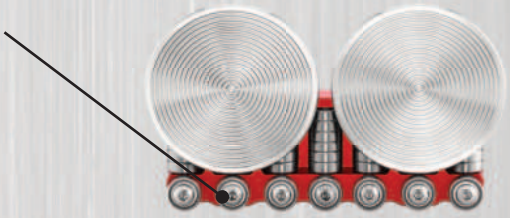
with Malco's Professional Grade Disc Benders

No waiting on wholesale roll formers!



Malco's 2-Station Disc Benders Features & Benefits

- Premium CNC aluminum and stainless-steel components for durability and stability
- Removable discs for quick disassembly and mid-panel tool removal
- Create 90º-180º bends on a wide variety of materials and material thicknesses for custom straight metal roofing details such as open hems, facia, ridge caps, or other interlocking features
- Bearing guides glide smoothly along material to precisely follow the initial bend
- For use with Malco's single station and 2-station benders
- Limited lifetime warranty
- And More!



2-Station Disc Bender Model Selector

2-Station Disc Benders provide pressure, stability and tracking for continuous hems over 10' long

- ***Small 2-Station Disc (FS2DS):*** Makes 5/16"-1 1/8" (8-30mm) bends
- ***Large 2-Station Disc (FS2DL):*** Makes 5/16"-1 3/4" (8-45mm) bends

Specifications

Metal Benders

Catalog Number	Description	Bend Depth	Bend Range	Bend Radius	Material Thickness
